Sameera Bhoyar

Student at Symbiosis Institute of Technology, Nagpur

sameerabhoyar009@gmail.com 8329666764 Nagpur, Maharashtra,India Sameera Bhoyar SAMeerAbhoyar

EDUCATION

Symbiosis Institute of Technology, Nagpur 06/2024 – Present
B.Tech CSE Nagpur, India

TECHNICAL SKILLS

Programming Language
HTML, CSS, C, Java, Python, SQL (Oracle, SQLite), DSA

Libraries
Pandas, NumPy, matplotlib, scikit-learn, TensorFlow, Keras

Tools
Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Eclipse

AI/ML
Machine Learning, Artificial Intelligence, Neural Networks, Deep Learning

COURSES

Machine Learning A-Z Present
UDemy

Data Structures and Algorithm using Python - Part 1
Infoysis Springboard

Programming in C
Infoysis Springboard

Introduction to Python Programming(AD141)
Red Hat Training

Red Hat System Administration I (RH124 - RHA) - Ver. 10
Red Hat Training

CERTIFICATES

- Data Structures and Algorithm using Python - Part 1
- Programming in C
- Introduction to Python Programming(AD141)
- Red Hat System Administration I (RH124 - RHA) - Ver. 10

PROJECTS

IoT Health Monitoring Project
Real-Time Patient Monitoring and Alert System
- Developed an IoT-based health monitoring system to track vital parameters (heart rate, temperature) in real time
- Enabled remote monitoring, data tracking, and alert system for early detection of health issues
- Improved patient care efficiency through continuous monitoring and smart alerts

TimeSnap – AI Timetable Assistant
Cross-Platform Smart Scheduling and Productivity Tool
- Built TimeSnap, an AI-powered timetable assistant using React, Node.js, Firebase, and Gemini API
- Implemented AI-based schedule recognition, real-time reminders, offline support, and cloud synchronization
- Achieved 90% accuracy in timetable extraction and reduced planning time by ~80%

Emotion Camera
Real-Time Emotion-to-Action Camera | React, face-api.js
- Developed a browser-native AI detecting 7 emotions with 61.8% accuracy, triggering contextual app actions (Spotify/Notion) via real-time facial analysis.
- Achieved <100ms latency by implementing 100% client-side inference, ensuring full data privacy and zero server-side costs.
- Optimized UX with a 10-second action cooldown and real-time confidence tracking, deployed via Vercel/GitHub CI/CD.

PUBLICATIONS

Revolutionizing Healthcare: IoT-Enabled Continuous Health Monitoring Devices for the Future
IEEE (ICETET-SIP 2025)
Co-authored and published at the 2025 12th International Conference on Emerging Trends in Engineering & Technology - Signal and Information Processing (ICETET-SIP), Nagpur, India. Authors: **Bhoyar, Sameera.**, Meharkure, A., Mishra, K., Dubey, P., Rakesh, N., & Purohit, N. DOI: 10.1109/ICETETSIP64213.2025.11156320

PROFESSIONAL EXPERIENCE

Elevatelabs
AI & Machine Learning Intern
Completed hands-on tasks in supervised learning, data preprocessing, and model evaluation using Python, scikit-learn, and Pandas.
